

Multiparameter Wrist Medical Monitor

**“Engineered for safety.
Designed for living”**

**Oxitone**[®]
Enhanced Remote Monitoring

Day & Night Blood Pressure Monitoring

Cuffless, and comfortable 24/7 blood pressure monitoring. Oxitone provides the complete cardiovascular picture and critical insights necessary for proactive health management

World's 1st Wrist Worn Fetal Pulse Rate Monitor

- Safe fetal & maternal monitoring without bulky Ultrasound devices
- Monitoring essential health parameters is crucial for ensuring both fetal well-being and maternal health
- Delivering critical insights and peace of mind

Precision Monitoring

- Seamless home monitoring
- Fetal Pulse Rate
- Fetal Heart Rate Variability (F-HRV)
- Maternal Vitals (SpO2, HR, HRV and Blood Pressure)

Clinical Advantage

- Reliable fetal remote monitoring without clinical or hospital visits
- Eliminates direct fetal exposure to Ultrasound waves
- Designed for both normal and high-risk pregnancies (Preeclampsia)
- Adaptability for future medical applications

Trusted & Regulated

- Patented PPG technology
- Clinically validated accuracy
